

## **EMERGENCY LIGHTING REFERENCES - ACIBADEM ALTUNIZADE HOSPITAL**

Acibadem Healthcare Group has opened its 22nd hospital located in Altunizade on the European side of Istanbul, with an investment volume of \$200 million. The group, which consists of a partnership of Malaysia's Khazanah Nasional, Japanese Mitsui & Co., Ltd., and Turkey's Acibadem, offers many firsts for its patients. Acibadem Altunizade Hospital is the first private hospital of its kind in Turkey and Istanbul, featuring the largest indoor area with a capacity of 350 beds and a surface area of 98,000 square meters, in not only Istanbul but also the rest of Turkey as well. In addition, the hospital also provides its services with a capacity of 75 intensive care beds and a parking area for 550 vehicles.

Acibadem Health Group has hospitals across Europe as well, serving patients in Iraq, Bulgaria, Macedonia and the Netherlands. Moreover, the group seeks to increase the volume of health tourism.

Acibadem Altunizade will be the first hospital to feature three different diagnostic units in a hybrid operating room. The hospital is equipped with a hybrid operating room system which integrates three different diagnosis units at the same location and makes it possible for operations in three different operating rooms to be performed at the same time. This structure provides guidance to surgeons by producing images of the patient during neurosurgery, cardiovascular surgery, orthopedic surgery and maxillofacial surgery procedures, and increases the success rate of treatments.
